Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's amendment dated January 03, 2006, has been fully considered.

Applicant has argued that Dick does not disclose the concept the inner float has a smaller draft than the outer float. However, Applicant points out on page 2, lines 23-26, of the amendment that in figure 6, the float 5 has a smaller draft. First, please note based on Applicant's argument, at least figure 6 meets the claimed limitation. According to that admitted concept by Applicant alone, the 102 rejection should be maintained. Second, please note the cross sectional surface areas of float 5 is smaller than float 6. Therefore, float 5 clearly has a smaller draft than float 6. This is exactly the same as Applicant's invention, the cross sectional area of the inner float is smaller than the outer float.

For the reasons set forth above, it's concluded that the rejection is proper and should be maintained. This Office Action has been made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-7, are rejected under 35 U.S.C. 102(e) as being anticipated by US 6857266 (Dick).

Please note figure 4 of Dick clearly discloses an outer float 6, an inner float having a spar shape 9, wherein the draft of the first float being substantially less than the draft of the second float. Therefore, a new ground of rejection has been made based on figure 4 of Dick.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6857266 (Dick). Dick discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the configuration values as claimed. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to elect different configurations for the floats in Dick for the purpose of achieving appropriate power output.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
